RELATIONS WITH MARKET PARTICIPANTS

6.2. Relations with KDPW_CCP participants

The KDPW Group companies in their operations and development actively consult the member community on an on-going basis on matters concerning their business operations.

In 2018, meetings were mainly dedicated to issues concerning services under development. In September 2018, members received an update of the development plans for 2019 and modifications of members' IT systems planned in 2019.

Details of the autumn 2019 implementation window were also distributed (following an analysis of the scope and timeline of projects, a single implementation window was scheduled for 2019 on 28-29 September).

MAIN AREAS OF DEVELOPMENT IN 2018

7.1 New services of KDPW_CCP for clients of clearing members

A new service launched for KDPW_CCP clearing members in the autumn implementation window on 17-18 November 2018 supports the processing of income on deposited margins and contributions to funds with regular transmission of additional data.

The data include the proposed distribution of projected income (monthly reports, the first two months of each quarter) and the proposed distribution of actual income earned (end-of-quarter reports) at the level of collateral accounts (PB) managed for clearing members in kdpw_stream (NKK level).

The efforts preceding the roll-out finalised the project and programming work. Details of system modifications, including message structures, were communicated in October 2018 and the new functionality was opened for testing in the test environment.

7.2 Automation of reporting under CPMI-IOSCO standards for CCP public disclosures

Software implemented at the end of Q2 2018 automates reporting under CPMI-IOSCO standards for CCP public disclosures. The project preceding the roll-out developed a specification of requirements, conducted tests and drafted the documentation. A new module developed in kdpw_stream for the solution (CRE) integrates data from external systems. A data exchange protocol between kdpw_stream and Bloomberg was developed in the project. The new kdpw_stream functionality automates data collection and generates XML files with data for reports published under the CPMI-IOSCO requirements.

The solution ensures compliance with the international CPMI-IOSCO standards for CCP public disclosures, which creates a competitive advantage in relation to other CCPs thanks to transparency based on disclosures available to members and other market participants in a relatively uniform format comparable with other CCPs. The final key project deliverables are quarterly reports published on the KDPW_CCP website.

MAIN AREAS OF DEVELOPMENT IN 2018

7.3 Development of the OTC clearing system, including communication with members

KDPW_CCP's project work in 2018 focused on providing new communication solutions for KDPW_CCP participants, including preparations for the implementation of state-of-the-art solutions offering participants access to the system (graphic user interface) and exchange of FpML messages. The FpML standard recognition process was initiated, a specification of requirements was drafted and the processing of new clearing messages was designed. KDPW_CCP is planning to develop applications of the new communication standard in co-operation with participants in a working group to be established. The launch of the state-of-the-art solutions will raise the standards of clearing services (standardised messages, speed of operation) and improve the efficiency and flexibility of solutions offered in clearing services.

7.4 Development of the clearing risk management system

In 2018, KDPW_CCP continued to work towards the implementation of new and the improvement of existing risk management functionalities and the automation of risk management processes executed using tools located outside kdpw_stream. The clearing risk management system ensures precise monitoring and measurement of risks combined with immediate calculation of collateral requirements.

To improve the quality and efficiency of the clearing risk management system and harmonise it with European regulations, KDPW_CCP focused in 2018 on a project implementing modifications to the mechanisms which update contributions and calculate the share in the clearing fund and guarantee funds. The project included modifications to the process of calculating contributions to the clearing and guarantee funds at the level of institutions rather than individual participant codes in the KDPW_CCP system, as well as the introduction of daily updates of contributions to the clearing and guarantee funds (replacing fund updates on a monthly basis). The project developed a specification of requirements and drafted amendments to regulations. The planned modifications were communicated to participants in January 2019, including modifications to the structure of messages concerning fund contributions.

The test environment will open for testing in May 2019 and the modifications will be implemented in the 2019 autumn implementation window. The development of the clearing risk management system included work aimed at the implementation of modifications to kdpw_stream automating risk management processes previously executed using tools located outside kdpw_stream. The project designed and developed new software supporting KDPW_CCP in the calculation of defined risk parameters and automating processes in the clearing risk management system.

MAIN AREAS OF DEVELOPMENT IN 2018

7.5 Harmonisation of kdpw_stream with UTP-MIFID II

On 3 January 2018, KDPW_CCP's system kdpw_stream successfully implemented modifications necessary to harmonise it with a new version of the Warsaw Stock Exchange (GPW) trading system UTP II and the BondSpot system which meet the regulatory requirements under MiFID II.

7.6 CCP Harmonisation of KDPW_CCP with EU regulations concerning recovery and resolution for CCPs

Amendments were drafted to the Rules of Transaction Clearing (organised trading) and the Rules of Transaction Clearing (non-organised trading) in order to implement CCP recovery and resolution regulations under EU law (BRRD, draft Regulation on recovery and resolution for CCPs) in KDPW_CCP regulations. The drafting of a KDPW_CCP Recovery Plan was delayed due to postponed legislative work on the Regulation on recovery and resolution for CCPs at EU level. The project will continue in 2019 in connection with prolonged EU work on CCP recovery and resolution regulations and related regulations (EMIR II) necessary to approve them.

As CCPs in the European Union are required to align their recovery plans with the international CPMI-IOSCO Principles for financial market infrastructures (PFMI) – Recovery of financial market infrastructures 2014, the Polish Financial Supervision Authority requested KDPW_CCP to present a recovery plan incorporating the tools defined in the Principles by mid-March 2019.

DEVELOPMENT PLANS FOR 2019

In 2019, the scope of services provided by KDPW_CCP and its organisational and technical infrastructure will continue to develop in pursuit of the strategic goals defined in the KDPW_CCP Strategy for 2017 - 2021.

Odpowiedzialność Zarządu i Rady Nadzorczej za sprawozdanie finansowe

Zarząd Spółki jest odpowiedzialny za sporządzenie, na podstawie prawidłowo prowadzonych ksiąg rachunkowych, sprawozdania finansowego, który przedstawia rzetelny i jasny obraz sytuacji majątkowej i finansowej oraz wyniku finansowego Spółki zgodnie z przepisami ustawy o rachunkowości, przyjętymi zasadami (polityką) rachunkowości oraz obowiązującymi Spółce przepisami prawa i statutem, a także za kontrolę wewnętrzną, którą Zarząd uznaje za niezbędną, aby umożliwić sporządzenie sprawozdania finansowego niezawierającego istotnego zniekształcenia spowodowanego oszustwem lub błędem.

Sporządzając sprawozdanie finansowe Zarząd Spółki jest odpowiedzialny za ocenę zdolności Spółki do kontynuowania działalności, ujawnienie, jeżeli ma to zastosowanie, spraw związanych z kontynuacją działalności oraz za przyjęcie zasad kontynuacji działalności jako podstawy rachunkowości, z wyjątkiem sytuacji, kiedy Zarząd albo zamierza dokonać likwidacji Spółki, albo zaniechać prowadzenia działalności, albo nie ma żadnej realnej alternatywy dla likwidacji lub zaniechania działalności.

Zarząd Spółki oraz członkowie Rady Nadzorczej są zobowiązani do zapewnienia, aby sprawozdanie finansowe spełniało wymagania przewidziane w ustawie o rachunkowości. Członkowie Rady Nadzorczej są odpowiedzialni za nadzorowanie procesu sprawozdawczości finansowej Spółki.

Odpowiedzialność biegłego rewidenta za badanie sprawozdania finansowego

Naszymi celami są uzyskanie racjonalnej pewności, czy sprawozdanie finansowe jako całość nie zawiara istotnego zniekształcenia spowodowanego oszustwem lub błędem oraz wydanie sprawozdania z badania zvierającej naszą opinię. Racjonalna pewność jest wysokim poziomem pewności, ale nie gwarantuje, że badanie przeprowadzone zgodnie z KSB zawsze wykryje istniejące istotne zniekształcenie. Zniekształcenia mogą powstawać na skutek oszustwa lub błędu i są uważane za istotne, jeżeli można racjonalnie oczekwać, że pojedynczo lub łącznie mogłyby wpływać na decyzyjne gospodarcze użytkowników podjęte na podstawie tego sprawozdania finansowego.

Zgodnie z § 5 Międzynarodowego Standardu Badania 320, koncepcja istotności stosowana jest przez biegłego rewidenta zarówno przy planowaniu i przeprowadzaniu badania, jak i przy ocenie wpływu rozpoznanych podczas badania zniekształceń oraz nieskorygowanych zniekształceń, jeśli występują, na sprawozdanie finansowe, a także przy formułowaniu opinii biegłego rewidenta. W związku z powyższym, wszystkie opinie i stwierdzenia zawarte w sprawozdaniu z badania są wyrażane z uwzględnieniem

jakościowego i wartościowego poziomu istotności ustalonego zgodnie ze standardami badania i zawodowym osiądem biegłego rewidenta.

Zakres badania nie obejmuje zapewnienia co do przyszzej rentowności Spółki ani efektywności lub skuteczności prowadzenia jej spraw przez Zarząd Spółki obecnie lub w przyszłości.

Podczas badania zgodnego z KSB stosujemy zawodowy osąd i zachowujemy zawodowy sceptyczny, a także:

- identyfikujemy i oceniamy ryzyka istotnego zniekształcenia sprawozdania finansowego spowodowanego oszustwem lub błędem, projektujemy i przeprowadzamy procedury badania odpowiadające tym ryzykom i uzyskujemy dowody badania, które są wystarczające i odpowiednie, aby stanowić podstawę dla naszej opinii. Ryzyko niewykrycia istotnego zniekształcenia wynikającego z oszustwa jest większe niż tego wynikającego z błędu, ponieważ oszustwo może dotyczyć zmowy, fałszerstwa, celowych pominięć, wprowadzenia w błąd lub obejścia kontroli wewnętrznej,
- uzyskujemy zrozumienie kontroli wewnętrznej stosowanej dla badania w celu zaprojektowania procedur badania, które są odpowiednie w danych okolicznościach, ale nie w celu wyrażenia opinii na temat skuteczności kontroli wewnętrznej Spółki,
- oceniamy odpowiedniość zastosowanych zasad (polityki) rachunkowości oraz zasadność szacunków księgowych oraz powiązanych ujawnień dokonanych przez Zarząd Spółki,
- wyciągamy wnioski na temat odpowiedniości zastosowania przez Zarząd Spółki zasady kontynuacji działalności jako podstawy rachunkowości oraz, na podstawie uzyskanych dowodów badania, czy istnieje istotna niepewność związana ze zdarzeniami lub warunkami, która może poddawać w znaczącą wątpliwość zdolność Spółki do kontynuacji działalności. Jeżeli dochodzimy do wniosku, że istnieje istotna niepewność, wymagane jest od nas zwrócenie uwagi w sprawozdaniu biegłego rewidenta na powiązane ujawnienia w sprawozdaniu finansowym lub, jeżeli takie ujawnienia są nieadekwatne, modyfikujemy naszą opinię. Nasze wnioski są oparte na dowodach badania uzyskanych do dnia sporządzenia naszego sprawozdania biegłego rewidenta, jednakże przyszłe zdarzenia lub warunki mogą spowodować, że Spółka zaprzestanie kontynuacji działalności,
- oceniamy ogólną prezentację, strukturę i zawartość sprawozdania finansowego, w tym ujawnienia, oraz czy sprawozdanie finansowe przedstawia będące ich podstawą transakcje i zdarzenia w sposób zapewniający rzetelną prezentację.

Przekazujemy Radzie Nadzorczej informacje o, między innymi, planowanym zakresie i czasie przeprowadzenia badania oraz znaczących ustalenach badania, w tym wszelkich znaczących słabościach kontroli wewnętrznej, które zidentyfikujemy podczas badania.
